

Amendments to the Specification:

Please amend the Specification as follows:

On Page 8, change the paragraph beginning on line 12 as follows:

--With the displacement of intermediate member 5 brought about by cam lever 11, this ~~cam lever 11~~ intermediate member 5 is guided on changeable element 4 and, in this connection, depending on the position of the element 4, it is forced against roller lever 32, causing a greater or lesser stroke of valve 2.--
